

**STATEMENT OF FACTS**

On September 18, 2012, members of the United States Park Police Narcotics Unit, received information from a confidential informant (CI) that an individual known to sell narcotics had arrived at 2652 Martin Luther King Jr. Avenue, S.E., Washington, D.C. in a black Nissan automobile. The CI also gave officers a description of the individual and stated that the individual had exited the vehicle and entered an apartment to make a drug transaction. Officers responded to the location and observed the vehicle parked in front of the building. Officers also observed the individual that was described by the CI exit the building and enter the vehicle. Officers made a traffic stop of the vehicle and the individual described by the CI was identified as defendant Lacroix Floyd. Officers removed the defendant from the vehicle and patted him down. During the pat down the officers felt a hard object protruding from the defendant's buttocks. The defendant was placed under arrest and transported to a United States Park Police station. At the police station the officers searched the defendant and recovered a plastic bag from the defendant's buttocks that contained another plastic bag with 13.3 grams of crack and 8 pink ziplock bags of crack that weighed approximately 2.5 grams. A portion of the rock-like substance field tested positive for cocaine base.

On September 19, 2012, officers went to the apartment where the defendant was staying at 2337 Green Street, S.E., #101, Washington, D.C., and received a signed consent to search from the lessee of the apartment. Officers searched a plastic bin in the master bedroom and recovered 354 grams of crack that was contained in 167 individual pink zips and three plastic bags. The pink ziplocks were identical to the pink zips recovered from the defendant the previous day. The plastic bin which was located in an area of the bedroom where the defendant stored his personal items also contained digital scales, empty ziplock bags and other paraphernalia. Also recovered from the pockets of the defendant's vest that was hanging in the bedroom closet was a plastic bag with 125 grams of crack, a plastic bag with 141 grams of cocaine powder and \$4000. A portion of the rock-like substance field tested positive for cocaine base and a portion of the white powder substance field tested positive for cocaine. The approximate weight of the rock-like substance and the white powder substance indicated that the drugs were going to be sold to others rather than used exclusively by the defendant.
